

# **LPG ENDERMOLOGIE**

## **NATURAL HEALTH and BEAUTY**

**We are a sales representative for LPG's endermologie cosmetic and therapeutic treatments for various markets within the spa and medical industries.**

### **What is endermologie?**

**LPG endermologie is an FDA cleared, patented, and proprietary technique of cellular stimulation through reproducible mechanical massage. It is 100% natural and effective, and targets the connective tissues of the body and face, including skin, muscle, blood and lymphatic circulation. This mechanical massage technique provides a deep tissue mobilization with beauty, wellness, rehabilitation, sports and aesthetic medicine applications.**

**LP is a world leader in cellular stimulation with proven technologies for health, beauty and well-being. LPG now operates in 110 countries throughout the world. LPG techniques are non-aggressive and non-invasive, with no downtime and no known side effects.**

**LPG has the leading technologies that provide the age-defying and beauty treatments that consumers are demanding by name. Our devices are backed by more than 145 scientific studies, and more than 100,000,000 patients are treated around the world with endermologie technologies every year!**

### **We Sell Solutions - Not Products**

**Results from the latest Scientific Studies:**

- > 70% increase in fat release (lipolysis)**
- > 240% increase in collagen production activation (skin re-densification)**
- > 80% increase in natural hyaluronic acid synthesis**
- > 46% increase in natural elastin synthesis**
- > 23% increase in firmness**

## Our Solutions

**Alliance Cellu M6**

**Mobilift Cellu M6**

**Huber 360 Evolution**

The new CELLU M6 technology is based on patented technologies for an unprecedented mobilization on all tissular levels

HUBER offers complete and intelligent training combined with 4 movements: flexibility & mobility, dynamic strengthening, posture & balance, resistance.

### Does Endermologie really work?

**Yes. The massage is how all the magic happens.  
The rollers of the hand-held machine will massage your trouble spots and help bring circulation to flush out fat cells.  
Through the massage you should have success!**

**LPG endermologie is the world leader in advanced connective tissue stimulation techniques and equipment for the face and body.  
In contrast to a lot of the techniques available on the market, LPG endermologie offers a 100% natural alternative:  
stimulating dormant cellular activity within our skin to fight all unaesthetic manifestations (wrinkles, sagging skin, localized resistant fat, cellulite appearance, and more).**

**In case you had not heard, cellulite is a skin issue, not a weight issue.  
There are all sorts of sound waves, cling film wraps, lasers, as well as chemical and carbon dioxide needles, touting themselves as a smooth-talking remedy for lumpy, bumpy skin. These are procedures on a bit of a hope and prayer.  
And then there is Endermologie, which just makes old-fashioned, non-intrusive, non-aggressive sense.  
The cellulite you can see is caused by a weakening in the mesh network of connective tissue and collagen fibres, thereby allowing fat cells to protrude through and show themselves to the world like marbles in a net bag.  
What that means is that diets do not work.  
Because it is a form of massage therapy, Endermologie can also help relieve muscle aches and pains, along with improving skin tone and general circulation.**

**Is it painful?**

No the treatment is very pleasant

**Please CONTACT [Khun Patty](#) by telephone or email for additional solution details.**

**K.Patty is a dedicated Spa Manageress by career and a certified entermologist.**

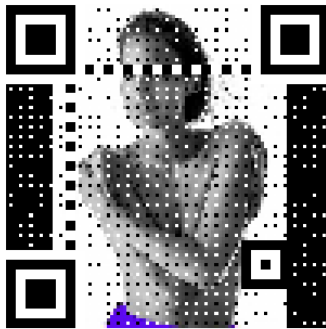

**She is a Thai national and speaks three languages:-**

**Thai, English and Chinese (Mandarin)**
